

## AEP-006

# Rollback Receipt Standard

Recovery must be proven, not merely promised

Version 1.1 Institutional Edition · Proof Gradient / Agent Evolution Protocol

### Purpose

AEP-006 defines the Rollback Receipt Standard: the proof object for recovery, restoration, reversal, compensation, freeze, quarantine, post-rollback verification, and post-incident review.

### Canonical Law

- No rollback, no release.
- No receipt, no recovery claim.
- No restore point, no promotion.
- No compensation path, no irreversible action.
- No post-rollback verification, no closure.
- No proof, no evolution.

### Required Objects

- Rollback Trigger
- Rollback Plan
- Rollback Request
- Rollback Authorization
- Rollback Receipt
- Rollback Verification
- Compensation Receipt
- Post-Rollback Review
- Recovery Bundle

### Public Line

AEP-001 defines the protocol. AEP-002 defines the docket. AEP-003 defines the packet. AEP-004 defines the gate. AEP-005 defines the permission. AEP-006 defines the recovery proof. GoalOS releases only what can recover, and proves when recovery happens.
