

The Proof-of-Evolution Constitution

AEP-001: The Blockchain-Native Standard for Proof-Carrying Intelligence Organizations

Aim. Act. Prove. Evolve.
Commit. Execute. Prove. Evolve.

GoalOS gives the network direction. PlanOS gives it strategy. Capability OS gives it capability. The Proof Gradient gives it evolution.

The Artifact Vault stores reusable intelligence. The Run Fabric executes agents at scale. The Proof Ledger records what happened. The Selection Gate promotes only what proved itself.

A model can answer. An agent can act. An institution must prove.

Do not put intelligence on-chain. Put proof of intelligence on-chain.

No proof, no evolution. No eval, no propagation. No rollback, no release.

Every agent acts once. The network learns forever.

The commercial primitive is the proof-backed upgrade right.
